Phi4-mini-instruct is a lightweight open model built on synthetic data and curated public websites, focusing on high-quality, inference-intensive data.

1. Model Scale

Model	Size
phi4-mini:3.8b	2.5GB

2. Performance

3. Using Phi4-mini

3.1 Running Phi4-mini

Use the run command to start the model. If you have not downloaded this model before, it will be automatically pulled from the Ollama model library:

```
ollama run phi4-mini:3.8b
```

```
root@kali:~$ ollama run phi4-mini:3.8b
pulling manifest
pulling 3c168af1dea0: 100% 2.5 GB
pulling 813f53fdc6e5: 100% 655 B
pulling fa8235e5b48f: 100% 1.1 KB
pulling 8c2539a423c4: 100% 411 B
verifying sha256 digest
writing manifest
success
>>> Send a message (/? for help)
```

3.2 Having a Conversation

How many minutes is a quarter of an hour?

The response time depends on the hardware configuration, please be patient!

```
>>> How many minutes is a quarter of an hour?
A standard hour consists of 60 minutes. Therefore, one-quarter (1/4) of an
hour would be:

(1/4) * 60 = 15

So, there are 15 minutes in a quarter-hour.

>>> Send a message (/? for help)
```

3.3 Ending the Conversation

Use the `Ctrl+d` shortcut or `/bye` to end the conversation!

3.4 Chinese Conversation

If you don't have a Chinese input method, you can refer to the tutorial on switching Chinese input methods.

Chinese conversation:

```
>>> 一个小时是多少分钟？请用中文告诉我
一小时等于 60 分钟。

>>> Send a message (/? for help)
```
